

(3) REMARKS

Reconsideration and allowance of claims 1-8, all of the claims in this application, are respectfully requested in view of the amendments and the following Remarks.

Claims 1 and 5 have been amended to obviate the rejection under 35 U.S.C. §112, second paragraph, made by the examiner for failing to set forth an “n” number for (CH₂)” in the formula. The claims have been *corrected by removing the parentheses*. The examiner’s attention is drawn to the fact that the strike through the parentheses is the notation used to show deletion of the parentheses.

Because no substantive objections or rejections remain, it is believed that the application is now in condition for allowance.

Applicants have made a significant advance in the art and have described it in a manner that clearly distinguishes it patentably from the prior art. Accordingly, reconsideration and withdrawal of the rejection and allowance of all pending claims are believed in order, and such actions are earnestly solicited.

Respectfully submitted,
